

Corrective Action Priority Ranking Criteria ("10CAPS")

Facility Name: J.H. Baxter Arlington Facility

Revision 3

Facility ID Number: WAD 3019

9/2011

Date Ranked: 6/5/2017

by: Jan Palumbo

Concur: _____ (supv) _____ (other agency)

The first three categories should be summed separately to give the overall environmental priority ranking. Categories 4-10 should be summed to give guidance as to how to manage corrective action at that facility, e.g., degree of oversight appropriate. Each category should be evaluated separately and independently from the other categories. For facilities where information is lacking, use best scientific judgment in assessing a ranking.
